15th | ANNUAL INTERNATIONAL CONGRESS

September 20 - 22, 2018

Hilton Munich Park Hotel, Munich

The implant borne single crown – the state of the art

Fit for THE alternative of three unit bridges after this congress!

We've designed a top-class scientific program for the whole practice team - in an Oktoberfest atmosphere!

Wednesday, September 19, 2018

PRE-CONGRESS

of the **DIGITAL DENTISTRY SOCIETY**

DEAR DGOI FRIENDS,

We are excited to welcome you to our 2018 Annual International Congress, focusing on single tooth implant borne restorations. Indicated in more than half of all dental implant related cases, single tooth implants are definitely worth having a closer look at from various perspectives – always taking into account latest findings and therapy concepts from both science and clinical practice, as characteristic for the DGOI. In this symbiosis between clinical practice and evidence-based science, the DGOI offers superior education with internationally recognized accreditation.

The 2018 DGOI Annual International Congress presents internationally renowned clinicians and key opinion leaders to share their knowledge, complexity, perfection and current state of the art in the single tooth implant therapy. In concise and highly informative 18 minutes presentations, you will learn essential information and take-home messages for your daily practice.

The DGOI is part of an international network and is therefore proud to welcome the Digital Dentistry Society International (DDS) for a pre-congress. As the digital future of dentistry is today, greatest leaders of contemporary digital dentistry will demonstrate workflows of innovative technologies, ranging from latest hard- and software products to the vast potentials of the so-called „virtual patient“ in dentistry.

Join the 2018 DGOI international Congress in a professionally and in friendly “Oktoberfest” atmosphere! We are Your partner for success in oral Implantology and digital dentistry and their advantageous combination.

Always NEXT TO YOU...

Mrs. Dr. Henriette Lerner & Mr. Dr. Paul Weigl
(Scientific Committee)
