THE BRIX HOTEL, PORT-OF-SPAIN | MAY 12 - 13, 2023 | 9AM-5PM

Course Schedule

MAY 12 - 13, 2023 | 9AM-5PM

DAY 1:
DIDACTICS
MAY 12

- Evaluate the needs of the site
- Understand fundamental biologic concepts
- Consider range of methods and materials
- Enhance grafting outcomes with blood products from the patient
- Learn how to create platelet rich fibrin (PRF) membranes and sticky bone
- Surgical principles of extractions & 3rd molar coronectomy
- The "Dirty Dozen" requirements of a graft
- Grafting concepts will be discussed pertaining to partial socket shield, ridge splitting, socket grafting simple to complex, sinus grafting and repair, as well as soft tissue concepts

DAY 2:
FULL DAY
PRACTICAL
MAY 12

- Phlebotomy principles and technique
- 90 min. presentation + live demonstration
- All willing delegates will do a live blood draw
- All willing delegates will use their own blood products to create various combinations of graft enhancements

THE BRIX HOTEL, PORT-OF-SPAIN | MAY 12 - 13, 2023 | 9AM-5PM

Course Objectives

By the end of this event, you will learn and be able to carry out the following:

- Fully understand principles of all grafting techniques and principles in dento-alveolar surgery
- Modified surgical protocols with dental extractions to maximize outcomes
- Socket grafting from standard to advanced
- The "Dirty Dozen" protocol and guide
- Learn and preform phlebotomy technique
- How and when to use the remarkable Platelet Rich Fibrin (PRF) membrane
- Create PRF clot for socket preservation
- Enhance any graft materials
- Create sticky bone

Course Includes a PRF Kit to make clots and membranes, and specific instruments

DAY 2
MAY 13

Assistants

As all know with certainty, we cannot do what we do without our assistants, literally the most valuable asset we have in a well-run dental office

We are opening our 2nd seminar practical day to any dental assistants wishing to join the event.

To be able to delegate part or all of the phlebotomy and PRF protocol would ensure we all focus on fewer things.

Full 8 hour didactics and practical on performing Phlebotomy and centrifuging whole blood to produce graft enhancement and membranes.

kit will be loaned for the day
inclusive of lunch and refreshments
join our socail event on the same evening
No early bird discount available

Dr. S. SenGupta, BDS FDS RCPS PGDip (Ortho)

Dr. SenGupta was trained and practiced in the UK, and is currently the principle

dentist of Dr. SenGupta & Associates in Antigua and Barbuda and Guyana (South America).

Since 1994, he has been a pioneer of dental implantology in the Eastern Caribbean, after post graduate studies in the US and Europe earning several Diplomats and Fellowships with numerous International Organizations. Always passionate about continuing education he has founded 3 post graduate implant training companies in the West Indies, culminating in this Implant Continuum, "Fundamentally Implants." Having presented throughout the US, the Caribbean, Australia and New Zealand he brings a wealth of hands on knowledge to the contemporary practitioner who wants to get started in implantology.

2-Day Event (Didactics + Hands-on):

Inclusive of PRF Kit and instruments
which will be used at the event
